NASSER to NIXON: "Mr. President, your move next!" ("your worst move for peace is more jets for aggressors")

By BENJAMIN H. FREEDMAN

Founder 1946

League for Peace with Justice in Palestine

The President of the United States and members of Congress surely must know that supplying additional Skyhawk and Phantom jets in 1970 to Zionists in occupied Arab territories will have disastrous consequences for the United States, and maybe for the entire world. They surely must know also that anyone who supplies a gun to another person to go out and commit murder is as guilty of murder as the man who pulls the trigger of the gun. Today the United States stands before the world judged guilty of murder for knowingly supplying Skyhawk and Phantom jets to Zionists in occupied Arab territories to murder helpless and harmless Arab men, women and children in cold blood. What have Arabs ever done to the United States to deserve that kind of treatment from them?

The President of the United States and members of Congress can hardly equate their oaths of office with now supplying military assistance to enable thieves to hold onto their plundered loot, stolen Arab territory. They are knowingly today helping crooks to hold onto their stolen loot. They are making the United States the accessory before and after the fact in a crime which includes mayhem, murder, and massacres. Have they no pride? Have they no shame? What can Zionists offer them as a consideration to degrade and disgrace the country which has done so much for each of them?

The President of the United States and members of Congress will some day and in some way be held strictly accountable by the people who elected them to the high offices they now hold, for disgracing and degrading the United States only to establish themselves in the good graces of Zionists to win their support for themselves in future elections. That reason appears to be a good enough reason for them to betray the best interests of the people who made them what they are today. They must have an idea that the unprovoked and unjustified slaughter of a minimum of one million (1,000,000) Arabs in the Middle East in the recent twenty-five (25) years was truly murder in cold blood. The dishonest clarifications they so frantically invoked did not convince all the two hundred million (200,000,000) U.S. non-Talmudists (non-"Jews").

With credit for it due to Presidents of the United States and members of Congress, Middle East Arabs have been compelled to fight without respite since 1948 in defense of their homeland for more than seventeen centuries. In defense of Middle East Arabs—if a defense is called for under existing circumstances—everywhere in this world

Gamal Abdel Nasser
President
United Arab Republic

from the beginning of time, it was not considered murder to kill an armed intruder who forces himself into another's home to steal that home for himself from its rightful owner. To take a life in defense of one's own home against armed intruders is both legally and morally justified in case self-defense becomes a matter of survival, "the first law of nature." Would the President of the United States and members of Congress deny Middle East Arabs a right this country would fight to the last man to defend? Zionist pressure has compelled the United States to adopt a double-standard in Middle East foreign policy to reciprocate Zionist support in elections for the Presidents of the United States and members of Congress? Whose faces are now turning red?

The President of the United States and members of Congress appear to be suffering from a very bad case of blindspots in their understanding of the simplest fundamentals of the Middle East crisis. Neither do they appear to indicate even the slightest interest in acquiring an understanding about the threat to the national security of this country. They just go on day after day repeating the untruths, half-truths and distortions of the truth Zionists keep putting into their mouths. Can it be possible they have not yet heard about the 1916 secret London Agreement that railroaded the United States into World War I? They now never discuss that but continue raving about the meaningless Balfour Declaration. How degenerate can political perverts get?

It shatters the sensibilities of persons informed on the Middle East background that the President of the United States and members of Congress should be in earnest about supplying Zionists in occupied Arab territories with additional military, economic and financial assistance. They are primarily not much concerned with the best interests of the United States. Their interest at this time must run in other directions, probably their chances of being re-elected.

As this goes to press, there is very little room left for doubt that President Nixon's next move in the Middle East crisis can avoid plunging the United States into war. The most qualified specialists in President Nixon's very own Department of State and Department of Defense have expressed the same opinion. They are firmly of this opinion based upon information on the subject available to them that President Nixon's next move in the Middle East crisis can be expected to precipitate another war which may soon develop into the third world war.

Their reasoning and logic are intelligent. They are the most reliable source for information on this subject. They feel there is only a poor chance to escape that tragic fate. They now think that chance depends entirely upon President Nixon's ability to withstand the pressure Zionists will put on him to favor them when President Nixon makes his next move in the Middle East crisis. It is sad but none the less true that the fate of this country may hang in the balance of President Nixon's next move in now supplying the Zionists with more jets.

It savors of a betrayal of time-honored traditions for the President of the United States and members of Congress to secretly conspire with Zionists in the United States for strictly personal political considerations to fix upon the number of additional Skyhawk and Phantom jets they will supply Zionists now in occupied Arab territories.

By what stretch of their imaginations do the President of the United States and members of Congress reconcile their support of Zionist aggression in occupied Arab territories with the noble principles of the Constitution of the United States which they have solemnly sworn to respect and uphold? By what theory of patriotism are they plundering taxpayers for money to aid and abet Zionists in occupied Arab territories retain illegal possession of territories they stole from Arabs they then expelled from their seventeen-centuries homeland.

The President of the United States and members of Congress know their political existence would be snuffed out like the flame of a candle in a Texas cyclone if they disobeyed instructions of Zionists on what
